

Job Openings

Evolva SA is a lively international biotech company operating in the area of discovery and development of pharmaceuticals.

Yeast Cell Biologist position in Basel, Switzerland

Key words: Yeast (*S. cerevisiae*) genetics, physiology, cell biology and biochemistry

Evolva is an early/mid stage biotech and drug discovery company using its proprietary platform technology to produce small molecular weight, active compounds. We rely on genetic engineering of both yeast and *E. coli*, to create novel "genetic chemistry" for in-house screening in pharmaceutically relevant, cell based assays.

To help in the further development of our core technologies we now wish to employ an experienced yeast cell biologist, with special qualifications and interest in the areas of yeast genetics and physiology, including cell cycle progression, mitotic and meiotic division, genome stability, homologous recombination, DNA double strand break repair etc.

Preferably you have a PhD in life science plus some years of post doctoral work, maybe even industrial experience. In addition to a solid theoretic foundation we expect you to have hands-on experience with standard procedures for handling end engineering yeast, since a major part of the job will involve working in the wet lab.

We are currently around 30 people working in modern facilities in Basel, Switzerland. We are hard working but, nonetheless, the atmosphere is relaxed and flexible. We appreciate good collaboration skills and a sense of humor.

For more information please contact Michael Naesby at Evolva: +41 61 485 2016. If you wish to send an application, please direct it to elodief@evolva.com (<mailto:elodief@evolva.com>) with the subject "yeast biologist".

European Patent Attorney position in Basel, Switzerland

Evolva has established a proprietary drug discovery platform in the area of **genetic chemistry** with three existing major partnerships to discover anti-virals, immuno-modulators and anti-bacterials. Our **two lead compounds** for anti-infective and cardiovascular/metabolic disease indications are scheduled to **enter the clinic** within the next 6 - 9 months. The company has about 70 employees and is headquartered in Basel with subsidiaries in India, USA and Denmark. This position is expected to be located in Basel.

The ideal candidate will bring strong patent competencies, a positive approach to business challenges and be team-oriented. In this critical and highly visible role, you will be responsible for harvesting inventions, patentability analyses, patent drafting and prosecution, third party IP analysis and strategic reviews of new project opportunities.

Requirements

- » 4-8 years of experience
- » PhD in chemistry or equivalent research experience in a related area relevant to the pharmaceutical industry
- » Qualified European or US Patent Attorney
- » Some licensing and contract experience is a plus
- » In-house experience at a biotech preferred
