

## PROJECT MANAGER OPERATIONS – REINACH, BASEL AREA (SWITZERLAND)

(Job Id EV1906-02)

**Evolva...** bringing sustainably sourced, next-generation health, wellness, and nutrition ingredients to the world.

Our lead ingredients are resveratrol for healthy aging products, a great-tasting zero-calorie stevia sweetener to help food and beverage producers replace sugar, and a novel prevention approach to help protect people and pets against the biting pests that transmit diseases like Lyme disease and Zika virus. Further, we are active in the flavors & fragrances market with ingredients.

More information on our approach to work life can be found on our website:

### **Job Description:**

Evolva is looking for an experienced Project Manager Operations with engineer background to coordinate, support and ensure timely execution of projects in operations at the Company's headquarters. This primarily regards monitoring of transfer of technologies from lab and pilot plant to manufacturing scale at Evolva's manufacturing partners, evaluation of potential CMOs and prepare process documentation and supports technology transfer.

Engineering and operational expertise is expected. Knowledge and experience of the manufacturing process of high value specialty ingredients by fermentation is certainly of advantage for this position.

### **Specific responsibilities:**

- Act as technical liaison with the Company's CMOs to insure smooth, safely and on time manufacturing process of top quality products
- Establish routine communications with CMOs and required Evolva personnel and facilitate and document the discussions and follow up actions that are required
- Optimizing and maintaining fermentation and purification principles for manufacturing processes. Ensure that the translation of Evolva processes developed at Lab/Pilot scale are properly laid out and adjusted to fit commercial scale facility
- Monitor and ensure timely execution of various projects in manufacturing, supply chain and quality control

### **Ideal candidate possesses:**

- BSc/MSc/Ph.D. in chemical engineering, biochemical engineering or related field
- 3 - 6 years of experience developing and/or operating fermentation/DSP/biotech and related manufacturing processes
- Project Management skills
- Very good command of English and outstanding skills in preparing presentations
- Experience and understanding of the needs and culture of a dynamic young entrepreneurial company with a very flat organizational structure designed to be results driven
- Ability to adapt quickly to changing environment and switch between various players

As a person, you are highly motivated to support challenging tasks together with your teammates. You are dynamic and enthusiastic and what you do and want to play a role in the commercial success of our novel products.

**Location:**

Reinach (BL), Switzerland

**What Evolva Offers:**

Competitive compensation/benefits package, which includes participation in Evolva's employee equity program.
